The Fund’s Statement of Additional Information provides additional information about the Fund’s Portfolio Managers, including their compensation, other accounts that they manage, and ownership of Fund shares.

The **About the Portfolio Managers** section beginning on page 14 of the Fund’s Statement of Additional Information is deleted and replaced with the following:

The Fund is managed by Cole Pearson, President, Investment Solutions, of the Adviser, Nathan Willis, CFA, CAIA, Director of Portfolio Strategy at the Adviser, and Andrew Manton, Chief Equity Strategist and Senior Portfolio Manager of the Adviser (each, a “Portfolio Manager, together, the “Portfolio Managers”). The Portfolio Managers’ compensation will not be based on the investment performance of the Fund, but will be a function of the overall profitability of the Adviser.

Each Portfolio Manager may also carry on investment activities for his own account(s) and/or the accounts of immediate family members. Conflicts may arise as a result of the Portfolio Managers’ differing economic interests in respect of such activities. The Portfolio Managers’ management of “other accounts” may give rise to potential conflicts of interest. The other accounts may have the same investment objective as the Fund. A potential conflict of interest may arise whereby a Portfolio Manager could favor one account over another, or the Portfolio Manager’s knowledge about the size, timing and possible market impact of Fund trades, could be used to the advantage of other accounts. In order to mitigate these risks, the Adviser has established policies and procedures to ensure that the purchase and sale of securities are fairly and equitably allocated. Where possible, the Portfolio Managers aggregate client transactions, including the Fund’s, when it is believed that such aggregation may facilitate the Adviser’s duty of best execution. Aggregation facilitates the pro-rata sharing of transaction costs and an average price of such transactions for client accounts that participate. The Adviser generally allocates securities among client accounts according to each account’s pre-determined participation in the transaction. The Adviser’s policy prohibits any allocation of trades that would favor any accounts or clients over any other account(s). The Adviser monitors trades daily to ensure this policy is not violated.
